CHAIRMAN'S REVIEW

On reviewing 2017 on the Common, the thing that comes most sharply to my mind is the intensity of colour that we experienced from March to June. Each emerging display seemed to compete for pride of place with those that had gone before. Blackthorn shone clearly from afar, gorse flower glowed in the sunlight, the birch trees stood out with a silvery glow and the heather seemed more widespread than ever before. The teams of volunteers who worked regularly on the Common should themselves be glowing with satisfaction for it is their continuous effort in clearing the scrub that has brought about the expansion of the heather and the regeneration of the gorse. Such profuse flowering was a joy to behold. We saw Westleton Common at its best and the experience was enriching. The early morning walk became an occasion not to be missed and for me, living on the edge of the Common, it began as soon as I set foot outside and passed beneath the cloud of brilliant pinky white blossom which smothered the Amelanchier at my Mill Street gate.

Not to be outdone and determined to have a place in this spectacle, the nightingale, Westleton's "Barley Bird", seemed to be exceptional in the strength of its presence and the question asked of walkers was not "Did you hear the nightingale?" but "How many nightingales did you hear?" Credit is due to the volunteers again because their work ensures that the Common continues to provide the habitat that the nightingale seeks.

I must also pick out from 2017 one particular task carried out by the Community Payback Team in clearing an area of scrub on the right of the Mill Street entrance. This opened up a new vista, a southward view along a small "valley", between the trees at the bottom and across the fields to the needle-like spire of Middleton Church, a view that was hitherto unseen.

Over 20 years ago when I first moved to Westleton I was talking with an acquaintance in a nearby town and when I said that I had recently taken up residence in Westleton he said, "God's little Acre", the prettiest village on the Suffolk Coast. Indeed, living close to Nature in all its glory, as we are in Westleton, can be an uplifting experience which enhances one's well-being. It is therapeutic. It makes people feel happy and happy people make happy communities.

Reading through Juliet's draft Report before writing this Review made me realise what a busy year 2017 has been. There were six Working Parties, six Nature Walks and several observation sessions by groups and individuals, all duly recorded in the final pages of the Report.

Many volunteers have been involved in organising these activities and the thanks of the Common Advisory Group go to all of them for their help in our management tasks.

I am sure that everyone would agree that a few people deserve special mention: David Rous for organising the Working Parties and planning the work schedules always with great enthusiasm and for looking after the Community Payback Groups. Everyone looks forward to the tea, coffee, cake and biscuits on a chilly morning and thanks go to Pam and Alan Hargreaves for turning up every month during the winter with these delicious comestibles.

My final word of thanks goes to Juliet Bullimore . A very big “Thankyou” for someone who, every year, draws together the stats, words, pictures and maps which go to make up this very interesting and useful document.

Sadly, but albeit understandably, after six years in the job Juliet has decided to stand down and 2017 will be her last report.

So, we now seek yet another VOLUNTEER. Someone to take over from Juliet and produce the Report starting with 2018. No particular qualifications needed - just a keen interest in a record being kept of what happens on the Common during the year. Juliet won't just disappear, she will be available to help her successor to settle into the job and to offer advice at any time.

For information and a chat about the nature of the job, please contact Juliet on 01728 648142 or Email juliet.bullimore@zen.co.uk

New Year's Day Bonfire and Fireworks

Once again the Bonfire Committee arranged a wonderful show, attended by a large crowd. An added attraction was the attendance of a fire engine, to cover the safety aspects of the event.

Refreshments were served in the Village Hall before and after the event, and there was a lantern procession up Mill St. from the hall up to the Common.

.....all that was left the following day.

A Little History

Part 2 - World War 11

A wartime warning sign on the Common
(Sign Loaned by Ronnie Strowger)

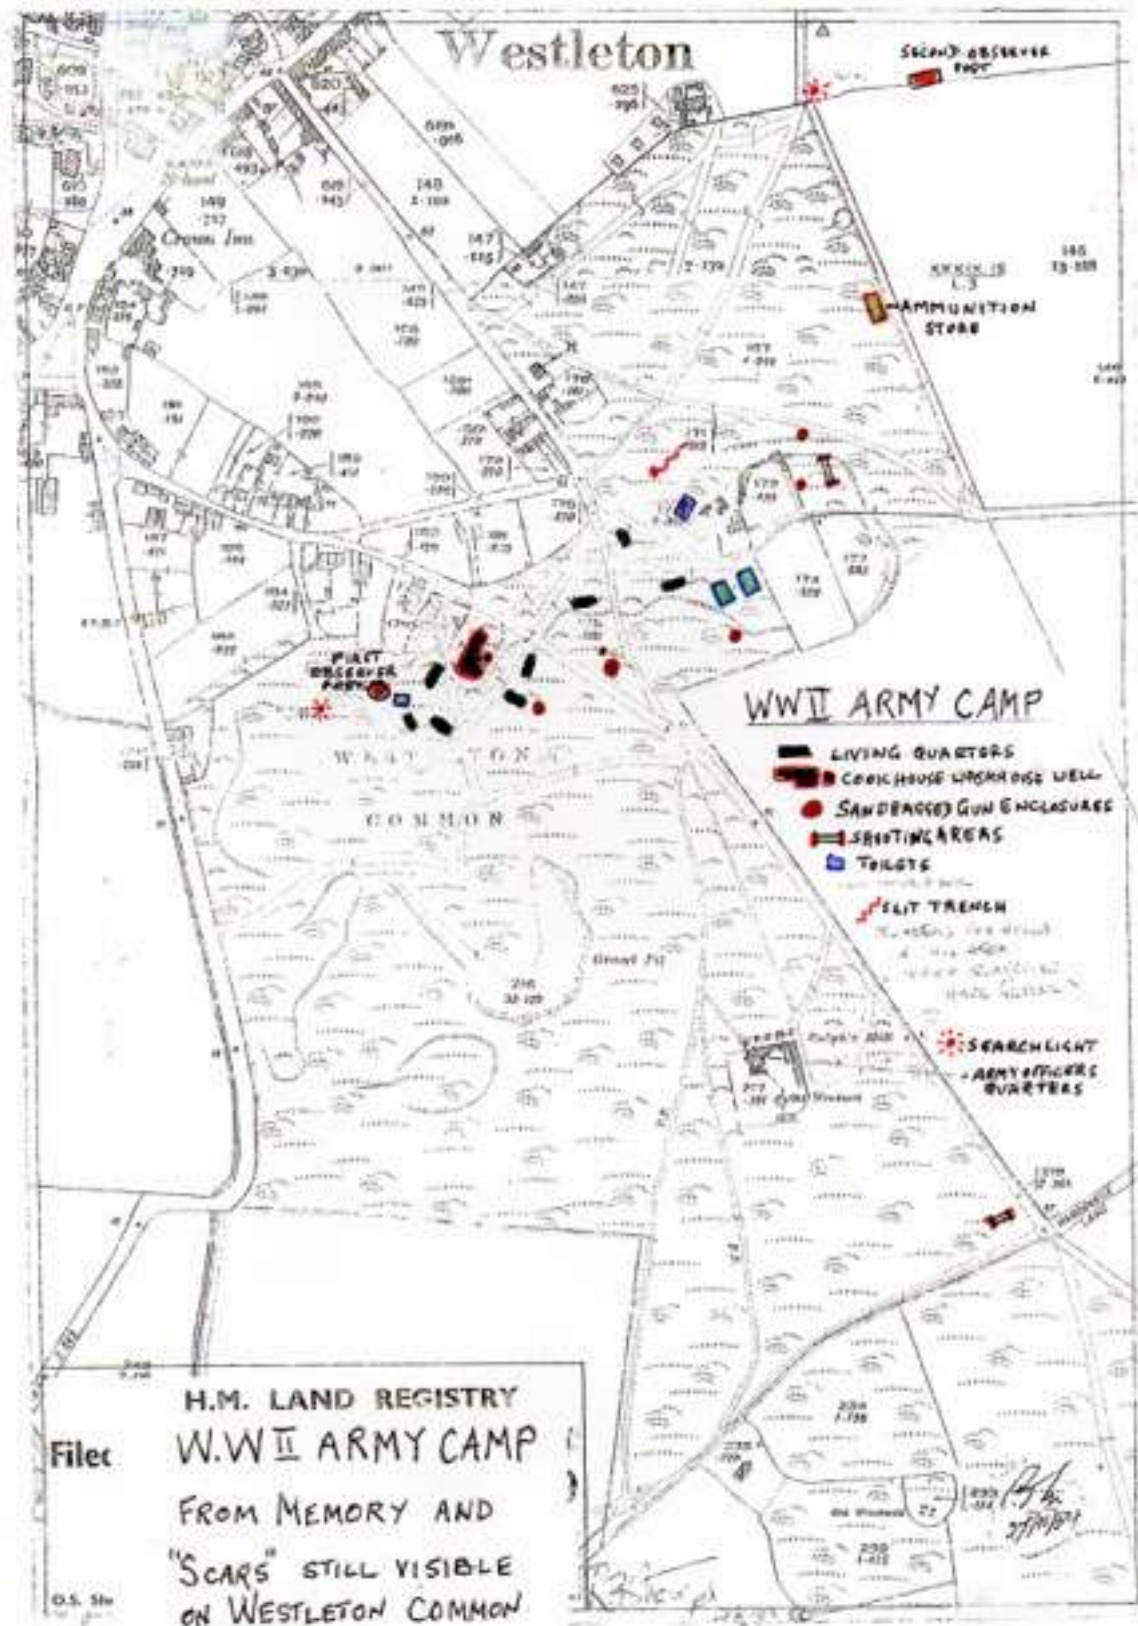

During World War II, the Common was used as a camp by the Army. Signs of their occupation can still be seen near The Pheantry and The Cleeves. There were no trees then on these areas, the rabbits kept all seedlings down. Concrete and brick bases for army huts and remains of boots can still be found. The sealed top of the well they dug is just visible beside the present-day tools container. They had a search light on the Noddle, observer posts, various target practice ranges, gun enclosures and trenches. Local children found a great many bullets and other artefacts to play with, sometimes with tragic consequences. Ammunition was stored at the edge of the northern boundary of the Common. The Officers were quartered in the Mill House, and all around the village.

Nissen Hut, 1955, near Cleeves' Railway Carriage. *Alf Fisk*

(The crane is trench digging, possibly for taking a water supply to the gravel workings further into the pit.)

World War 11 Army Camp on Westleton Common

Working Parties 2017

Saturday January 21st

9 people

Gorse was cleared to the right of the path leading northwards from the sandy mound towards Ralph's Mill, to enable the heather to regenerate - this is a sheltered spot favoured by Silver-Studded Blue butterflies.

Saturday February 18th

14 people

Gorse clearance in central part of the Common - south of Ralph's Mill

Welcome refreshments provided!

Also, on this day new railings were erected, by more volunteers, up the zigzag path to the Noddle:

Saturday March 18th

14 people

Being the last working party before the summer, we made sure the main paths were passable, and cut back undergrowth where necessary. Rubbish was collected, mainly from the Reckford Rd layby area. Bracken was raked off the area adjacent to the Noddle car park.

Saturday 17th June and 12th August

Extra Working Parties - Bracken cutting on bank to west of concrete square.

Saturday September 16th

7 people

Gorse and brambles cut back at the top of the track leading up from the Reckford Rd towards the concrete area.

Saturday October 21st

9 people

Clearance at the top of the path from Reckford Rd - at the south eastern side of the Common.

Saturday November 18th

5 people

Overgrown path on south side of Ralph's Mill widened - by several feet either side.

David Rous did sterling work organising and leading all the work parties during the year, and also monitored the occasions when community payback workers again cleared large areas of gorse, for which we are very grateful.

Nature Walks and other Observations

January 24th - several robins and one wren, and one squirrel.

February 19th - 3 pheasants, Great Tits, Chaffinch (heard), Robins, raucous Seagulls on adjacent field, Blackbird (female), Blue Tits, Ear fungus.

Nature Walk Saturday February 25th

9 people

Goldcrest, Robin, Great Tit, Blue Tit, Chaffinch, pheasant feathers.

Muntjac deer

Snowdrops, gorse in flower, bee orchid leaves, Southern Hemisphere Liverwort (naturalised in UK since 1950's).

Brain Fungus on Gorse

Southern Hemisphere Liverwort

March 2nd - Brain fungus - a brightly coloured feature of the winter scene:

March 20th - Moth traps set by Clive Ireland and Jon Evans - a list of the moths identified can be found in the index.

March 31st - scented Gorse flowers, Chiffchaffs, Great Tits, Peacock butterfly.

Nature Walk Saturday April 8th

14 people

Birds - Chiffchaff, Chaffinch, Blackbirds, Robin, Linnet, Blackcap, Great Tit, Mistle Thrush, Greenfinch, Skylark, Gulls.

Insects - Large Gorse Mining Bee, 7spot Ladybird, Early Bumblebee, Common Carder Bee, Honeybee, Redtailed Bumblebee, Bee Fly, Gorse Mites, Small Copper butterfly, Orange Tip butterfly, Antlion sandtrap.

Also seen in the last few days by David Rous: A stoat, and some butterflies: Brimstone, Comma, Peacock, Tortoiseshell, Orangetip.

Plants in flower - widespread flowering of Gorse, Green Alcanet, Ground Ivy, Field Speedwell, Violets, Climbing Corydalis, Storksbill, Dandelions, Blackthorn.

Easter Sunday, 16th April - Nightingale heard near the main Common noticeboard and a Holly Blue butterfly:

Wednesday 26th April - 2 or 3 Nightingales singing, Chiffchaffs, Chaffinches, Blackbirds, Wrens.

Nature Walk Saturday 20th May

11 people

Birds - Turtle Dove, Nightingale, Swifts, Chiffchaff, Chaffinch, Crow, Magpie, Swallow, Cuckoo (heard), Wren, Wood Pigeon, Blackbird, Blackcap, Linnet

Insects - Hawker Dragonfly, Bufftailed Bees, Common Carder Bees, Small Copper butterflies, M & F, Common Blue butterfly, Soldier beetle, Bee fly.

(Also seen, the day before - Butterflies: Small Heath, Orange Tip and Comma.)

Soldier Beetle, Buckshorn Plantain
Spotted Medick

Silver-leaved Cinquefoil

Flowering plants: - Bugloss, Dovesfoot Cranesbill, Storksbill, Buckshorn Plantain, Sheeps Sorrel, Spotted Medick, Germander Speedwell, Fiddleneck, Wood Aven, pink/blue flowered Comfrey, Periwinkle, Hemlock, Alexanders, Common Vetch, Red Campion, Changing Forgetmenot, White Comfrey, Dog Rose, Hairy Tare(Little Vetch), Lesser Trefoil, Mouse Ear, Bramble, Hawthorn, Cat's Ear, Silver leaved Cinquefoil, Foxgloves - pink and white flowered, Mossy Stonecrop.

Mosses - Polytrichum, Campylopus

Fungi - Ear fungus, Brain fungus.

Observations

May 25th evening - Nightingale singing at top of Bakers Lane, and Turtle Dove churring.

May 27th - Heath Bedstraw widespread on Old Football Field part of Common.

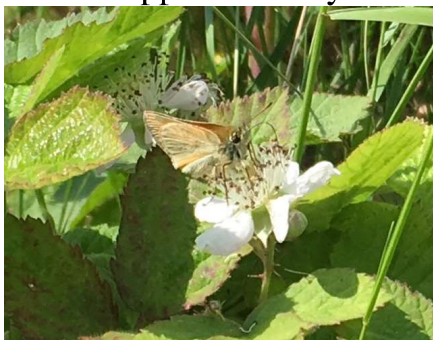

June 4th evening - Turtle Dove, Blackbirds, Cuckoo, Chiffchaff.

June 5th - dozens of Silver Studded Blue butterflies in several places on the Common.

June 12th - Butterflies: Red Admiral, Small Heath, Silver Studded Blues.

June 17th - Skipper butterfly

Wall Pennywort

Sunday June 18th

Moth Traps were set overnight next to the Railway Carriage by Clive Ireland and Jon Evans. At least 47 different species of moths were identified - see Appendix for full list.

Blotched Emerald moth

More Observations

June 19th - very hot, still 30degC at 4pm.

Butterflies - Small Heaths, Red Admiral, Tortoiseshell, Meadow Browns, Gatekeepers.

Flowers - a carpet of Creeping Cinquefoil, Bird's Foot Trefoil, Scarlet Pimpernel, Heath Bedstraw(North Common)

Birds - Turtle Dove churring, Chiffchaffs, Chaffinch, Greenfinches.

Turtle Dove

June 23rd - still warm, also breezy.

Butterflies - Silver Studded Blues, Small Heath, Ringlet, Meadow Brown, Skipper. Dragonfly.

Birds - Chiffchaffs, Chaffinch, Greenfinch.

Flowers - Moth Mullein.

Nature Walk Saturday July 1st

9 people - weather sunny, war and a little breezy.

Butterflies - Purple Hairstreak, Comma, Large Skipper, Small Skipper, Red Admiral, Large White, Common Blue, Meadow Brown, Tortoiseshell, Small Copper, Cinnabar caterpillars, Ringlet, Grayling.

Bees - Tree bee, Bufftail, Chocolate Miner, Oak Miner, Vestal Cuckoo bumblebee, Common Carder, Bombus lepidarus, Wolf bee hole.

Other insects - Hoverflies, Robber fly, Brown Hawker, Common Darter, Grasshopper, Parasitic wasp, Ruby-tailed wasp.

Funnel Spider.

Birds - Turtle Dove, Blackbird, Wood pigeon.

Plants in flower - Ragwort, Creeping Thistle, Yarrow, Black Moor grass, Scarlet Pimpernel, Sheep's Sorrel, Moth Mullein, Foxgloves, Toadflax, St John's Wort.

Serious study of a bee species

Purple Hairstreak Butterfly

Moth Trapping Session Saturday August 5th

Traps set by Clive Ireland and Jon Evans

10 people (including 2 young children) came to view the moths

-- species identified - see Appendix for list.

Also seen that day some early Parasol mushrooms amongst the heather:

Nature Walk Saturday September 2nd

5 people

Butterflies - Large White, Small Heath, Speckled Wood, Tortoiseshell, Grayling, Small Copper, Purple Hairstreak, Gatekeeper.

Other Insects - 7-spot Ladybird, Common Darter, Common Carder bee, Buff-tail Bumblebees, Southern Hawkers, Emerald Damsel Fly, Parasitic wasp, Bee Wolf, German wasp, Common Meadow Grasshopper, Heath Collet's bee, Heath bee, Honey bee.

Spiders - Orb spider and a Wolf spider.

Birds - Young Swallows, Chaffinch, Crow, Meadow Pipit, Blackbird.

Plants in Flower and fruit - Bramble, Honeysuckle, Dog Rose, Common Cudweed, Elderberries, Hawberries, Bird's foot trefoil, Common Mullein, Storksbill, Centaury, St John's Wort, Ragwort, Yarrow, Western Gorse, Bell Heather, Ling, Scarlet Pimpernel, Herb Robert, Hoary Cinquefoil, Moth Mullein, Hawksbill.

Gatekeeper butterfly

Other observations

September 24th - many dragonflies, Small Copper butterflies, Parasol mushrooms and Fly Agaric fungi.

September 30th - a hornet on slope to east of Ralph's Mill, Painted Lady butterfly

October 13th - Small Copper and Red Admiral butterflies.

October 25th and 29th - Fungi - Deceivers, Moor Club, Birch Bolete.

Last Nature Walk of the year - Saturday November 4th

6 people

Birds - Goldcrest, Bluetit, Great Tit, Robin, Longtailed Tit, Redwing

Flowers - Moth Mullein, Centaury.

Insects - Buff-tailed bee

Spiders Gorse mites

Fungi - Pink Russula, Parasol, Galera, Oyster, Buttercap, Birch Bolete, Earthball, Turkeytail, Moor Club, Wax Cap, Candle snuff.

More fungi were identified during the walk, and also on November 5th and 10th which are listed in the Appendix.

Wax Cap Fungus

The wildlife listed is by no means an exhaustive list of species seen on the Common, but is intended to give some idea of the variety that can be found during the year.

David Rous 2017 observations:

Butterflies - Peacock, Orange Tip, Comma, Holly Blue, Silver Studded Blue, Purple Hairstreak, Green Hairstreak, Large White, Green-veined White, Small Copper, Small Heath, Small Skipper, Large Skipper, Ringlet, Meadow Brown, Essex Skipper.

Bees - Tree, Tawny Miner, Hairy Legged Flower, Early Bumble, Common Carder, Large Gorse Mining, Buff-tailed Bumble, Red-tailed Bumble, Heath Bumble, Oak Miner, Wool Carder, Heath Collette.

Also - Bloomed Grey Longhorn Beetle, Hawthorn Shieldbug, Oak Shieldbug.

Reptiles - 2 Adders on south side of Noddle, 2 Adders on S. edge of Old Football field.

4 Adders on SW corner of Common
